Cyber Essentials Scheme

Mitigate risk from cyber security threats

Techpro Global Group provides a Cyber Essentials Scheme assessment service with everything you need to achieve CREST accredited Cyber Essentials Plus certification.

Techpro Global Group's Solution

As a CREST accredited Certifying Body, Techpro Global Group can help your organization achieve Certification to the Governments Cyber Essentials Scheme (CES).

The Cyber Essentials Scheme (CES) is broken down into two stages:

- CES Stage 1
- CES Plus (Stage 2)

Service Details

Stage 1

This involves completing a questionnaire and submitting it to Techpro Global Group for scoring and your external network undergoing a Vulnerability Scan. If no failing issues exist, then a pass certificate is immediately awarded.

However, if issues are present that result in a fail, you will receive a detailed report outlining the issues and advising on remediation steps. The security tester will be available to discuss the issues in detail.

CES Plus – Stage 2

This is conducted onsite at your office and involves performing a Build Review of a sample of Work Stations (and Servers under certain conditions), checking if email, web filtering is effective. The service also reviews your host-based antivirus/malware solution. A sample of mobile devices will also be reviewed to ensure that they are correctly configured and up-to-date.
